Description

With simultaneous reception of Low & High Ku-Band 10.70-12.75 GHz (model E) or 10.95-12.75 GHz (model B) you are ready for all demands.

It comes with Ultra Low Phase Noise is standard to meet the requirements for reception of DVB-S2X (professional profiles), N3 and N4 signals.

Can be ordered as a Single polarisation LNB or as a Quattro LNB for both Horizontal and Vertical polarisation including OMT and weather protection case.

Ultra Low Phase Noise (ULP) is recommended* for:

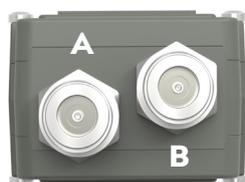

DVB-S2: - Narrowband 8PSK 8/9 and 9/10 FEC
 - 16 APSK or higher modulation type (any bandwidth)
 - All applications with "Pilot Off"

DVB-S2X: All "MODCODS" and symbol rates

NS3/NS4: All "MODCODS" and symbol rates

* Please note that these are general recommendations and that all other system components also will influence system performance.
