

DA-100

1x4 Distribution Amplifier

ASI, 310M & SD-SDI

- 1 Equalized and fully isolated input, 75 ohm BNC connector
- Input signal lock detection LED
- 4 Equalized and fully isolated outputs, 75 ohm BNC connector
- Very low jitter
- Data rates from 4 Mbps to 270 Mbps
- Use with encoders, analyzers and other compliant equipment
- Ultra compact, reliable, cost effective solution
- Comes complete with power supply
- LED Power Indicator

DESCRIPTION

The **DA-100** is a compact general purpose distribution amplifier for use as a point-to-multipoint distribution hub of signals around your facility or an inline repeater to extend the signal over greater distances.

The **DA-100** is the **ONLY** distribution amplifier on the market with equalized fully isolated internal circuitry protecting either input or output from DC line spikes.

The **DA-100** has a relay by-pass to the primary output allowing signal continuity in the event of power failure.

The **DA-100** has a small form factor replacing rack mounted equipment frames saving valuable rack space. The **DA-100** is a simple and cost effective solution.

SPECIFICATIONS

Formats

DVB-ASI:	270 Mbps
SMPTE 259M:	270 Mbps
SMPTE 310M:	19.392658 Mbps

Made in the USA
