# **FEATURES**

Ultralinear Lightweight High Efficiency Broadband

# STA4517 Ka series 175W Antenna Mount HPA

The STA4517 Ka series HPA provides ultra linear, high efficiency performance in a compact, lightweight, rugged, weatherproof, antenna mount enclosure. The advanced packaging and cooling techniques enable the unit to operate in extreme environmental conditions from direct rain to direct sunlight. The amplifiers can be simply deployed anywhere in the world, are user-friendly and incorporate a comprehensive remote control facility as standard, including RS485, RS232 and Ethernet options.

The HPA incorporates a high efficiency multi-collector TWT powered by an advanced power supply built on over 30 years of experience in the design and manufacture of satellite amplifiers.

The company's products have an enviable reputation for performance, robust quality and reliable service.

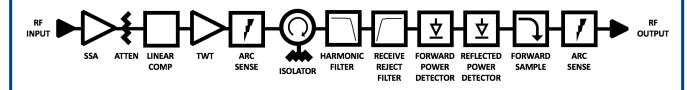

The STA4517 Ka is available with a wide range of options and accessories, backed by worldwide technical support.

## Features

- Advanced cooling design enables operation at +60°C and in direct sunlight
- Weatherproof antenna mount construction allows exposed mounting
- Ethernet/SMP/Webpage GUI interfaces
- Broadband high efficiency operation

- CE complaint
- Wide input voltage range can operate from mains supplies worldwide
- Redundant control contains control and drive circuits for 1:1 redundancy
- Stand-alone setting automatically sequences to transmit mode
- Wide range of accessories including: Controllers, waveguide networks, cable assemblies
