## $32 \times 32$ Enigma 500-3150 MHz Combining Switch Matrix / Router

4th generation Enigma Matrix with enhanced RF performance including variable gain -5 dB to +5 dB settable at each input.

500-3150 MHz operating frequency range

Typical applications:

- RF content acquisition
for TVRO \&IPTV headends
- Signal monitoring of satellite traffic
- Remote controlled unmanned satcom sites

Upgraded local control
\& monitoring via front panel capacitive touchscreen

## Suitable for HTS

applications due to
extended bandwidth

Compact up to 32
inputs $\times 32$ outputs in a 6 U high chassis

Self diagnostics with continuous monitoring of amplifiers, CPU's \& PSU's

Dry contact alarm port \& serial communications
for amplifier \& power supply status
